Failed Transaction Handling Procedure

1. Verify the transaction reference number.
2. Check the transaction status in the transaction system.
3. If the transaction failed, verify whether the customer account was debited.
4. If the account was debited but the transaction failed, create an investigation request.
5. Record the investigation reference number.
6. Notify the customer according to the approved communication procedure.
7. Do not confirm a refund until the transaction investigation is complete.
